

Hunting Catalogue

Live the emotion of unique moments ■

A person wearing a brown tweed jacket, a blue and white checkered shirt, and a brown leather belt with a shotgun shell holder is holding a Zoli shotgun. The background is a blurred field of tall grass under a cloudy sky.

Follow your instinct ■

Dear shooters and hunters,

It is with great pleasure that I personally introduce our new catalogue to you.

I hope you will find it comprehensive and easy to read. We are very proud of the growing interest in the Zoli brand and feel it is time to improve the quality of our communication. The objective is to enlighten the shooting and hunting fraternity about our company and the innovative products we are manufacturing.

We are very happy and feel rewarded that an ever growing number of people are using our guns with satisfaction and are achieving better results than ever before. This is a very encouraging trend and gives us an incentive to continue our work with enthusiasm and dedication. A commitment that presents difficult challenges but is well compensated by the satisfaction we get from the ever growing victories accomplished at national and international level by our loyal clients.

We firmly believe that innovation and tradition can and must co-exist and it is for this reason that our products, while technologically advanced still retain the universal principles of the most classical gun making traditions. As a result, Zoli's guns are highly evolved as far as materials and technology are concerned but offer a very classical, highly refined design. In this catalogue we are very proud to introduce the latest generation of guns, researched and built on the basis of a simple philosophical concept: Quality must never be compromised or sacrificed.

Shooters and hunters who have been using Zoli's guns for some time already appreciate the characteristics that make our products unique. Our success is also due to the generous and positive feedback offered by clients who, after using our guns feel the need to share their experiences.

Their endorsement and support has led to the strong growth of our brand, taking it to a new level within the top market segment. I hope you find this catalogue interesting and informative.

Thank you and warmest regards,

Paolo Zoli

Where does the ZOLI quality come from

The origin of Antonio Zoli Spa finds its roots in the historical and cultural context of the post-war period following World War II. An embodiment of the typical entrepreneurial spirit that marks people from the area around Brescia, Antonio Zoli played an active part in the rebuilding stages following the war's events that also involved the valley of the river Mella, where the company is located, taking the first steps in a business that would shortly project his name to markets around the world. Antonio Zoli was born in 1905, his father Giuseppe built flintlocks in his shop in Magno, a small hamlet perched on the mountain above the present company's location in Gardone Val Trompia, the place where several famous gunsmithing families come from.

Since the 14th Century, Magno was highly appreciated for the quality of its guns, most of which were destined for the governments of Venice, Piedmont and Naples. From archive research it has been established that the Zoli family was active in Magno from the year 1490, where they were involved with local artisans working along with the early arquebus makers who were masters of rare sensibility who had honed their art in the manufacturing of firearms during the early decades of the 15th century. Over the following centuries the Zoli family business grew steadily and by 1867 Giovanni Zoli was consid-

ered a flintlock maker of great repute. Proof of his activity is found in an ex-

quisite muzzle-loading pistol depicting the family logo that is presently stored in Zoli's gun shop - a symbol of the enterprising spirit and determination that the valley developed through the centuries.

Reading thorough the Zoli family history is like following a series of events that involved the Val Trompia area and its population. Living there instilled in Antonio Zoli the values and traditions that are so deep rooted they are considered indissoluble even today. Captivated by the appeal of the valley and the strong passion inherited from his ancestors

for guns and the precision mechanics it took to build them, Antonio entered the family business. The beginning of Antonio Zoli's career saw him collaborating with the main companies in the gun trade and subsequently in October 1945 he started his own business, taking him from a renowned gunsmith to one of the most relevant industrialists of the valley.

When Antonio's sons entered the business the company was restructured to further boost product quality also a fresh approach to marketing provided excellent results. By employing master gunsmiths who combined high quality components manufactured on modern machinery with old world classic parameters, Zoli was able to produce fine quality smooth bore barrels, with hammer or hammerless, over and under and side-by-side actions. Always willing to satisfy any market requirement, Antonio Zoli Spa developed an awareness for new trends. In 1956 they became the first company in the world to build replicas of old muzzle loading guns, marking the start of a new market that would become extremely important. Another achievement was in the 1960's when Antonio Zoli Spa again became the first company in Italy to manufacture combination guns on an industrial scale, breaking the monopoly held by gun makers in Central Europe.

A few years later, over-and-under and side-by-side express guns were added to the catalogue, as well as bolt-action guns, a product that reached thousands of units, both in hunting and varmint versions. At the beginning of the 1990s, following the success achieved across all

markets, Zoli decided to make a range of Drilling guns designated as the MG-92. This step represented a new challenge - competing with long-established, well-known manufacturers from Eastern Europe. The product launch was a blazing success, so much so that production continued for over twenty years. Zoli's Drillings (2 smooth bore barrels, one rifle) remain today the only such gun ever to be industrially manufactured in Italy.

At the end of the Millennium, under the dynamic direction of Paolo Zoli, the company took on a great new challenge in the over-and-under segment. The new project was called the 'Clas-

a dramatic change and thanks to this constant development Zoli today has direct control of complete production, from planning and research to product sales. In recent years, the company has achieved amazing results in various shooting disciplines, winning national and international championships with a progression that clearly shows the extremely high ballistic and dynamic qualities found in Zoli's guns. In the wake of these triumphs, Zoli successfully developed a custom shop that has managed to satisfy even the most demanding of requests. The continued appreciation shown over the years by loyal customers is the best endorsement to Zoli's work as well as their growing

sic Revolution 4' as it included four types of over-and-under guns: Target and Hunting smooth bores, Express and Combination rifles. Thanks to this project, the company has today reached its objective of placing its products in the highest market segments. In fact, all four guns have technical characteristics available only on top quality firearms that are produced in limited quantities. At the beginning of the new Millennium, production methods, techniques and technologies had undergone

presence in markets the world over. The traditions of a family business, now in its third generation, that have managed to adopt technological innovations without altering the love a craftsman has for his products.

It is thanks to this rich history that Zoli can today be proudly named among the very few businesses offering a wide range of prestigious products that are planned, researched and produced completely in-house.

Barrel soldering

Zoli was the first company in the world to develop an industrial process to silver solder shotgun and rifle barrels. This technique guarantees the most precise and durable joining of barrels compared to the more traditional approach which employs tin alloys. Further advantages include a more homogeneous assembly providing a drastic reduction of micro-vibrations contributing to reduced recoil when shooting and the ability of guaranteeing point of impact. Additionally a highly durable chemical blueing can be used to help retain the aesthetics of the gun for years. Today all Zoli barrels are made with this exclusive technique.

Forged Components

The action, trigger plate and monoblock form the foundation of the gun. Such components are all made using forged alloy steel. Amongst these components, the new solid action is the most important and innovative. Because the trigger plate mechanism is completely independent from the action, it does not sustain the stress and strain that could affect the adjustment of the firing mechanism.

High adjustment standards are therefore guaranteed even under prolonged heavy use. The detachable trigger mechanism also facilitates easy maintenance. Each and every machined part is checked for correct dimensions.

Percussion system

Zoli's percussion system has been designed to the highest standards of safety that technology can offer. The firing pin is guided by a specially made bushing that ensures its perfect operation. The bushing is also provided with vent holes, to allow any gas produced by the accidental perforation of the cartridge primer to escape, without damage to the gun or injury to the user.

Barrels

Zoli have manufactured guns for more than 70 years and we commenced manufacturing our own barrels in-house more than 55 years ago. The ballistic performance of our barrels is legendary and the envy of all other shotgun manufacturers. Our extensive experience has always been underpinned by on-going research making it possible to ensure matchless ballistic performance with reduced recoil. Our years of intense ballistic and materials testing enables us to provide superior pattern distribution with higher energy yet softer recoil. Only Zoli barrels achieve this and we are willing to pit our barrels against any other makers barrels - any time.

Locking System

All of Zoli's guns are equipped with a particularly robust locking system consisting of a split locking bolt that mates accurately with the locking lugs of the mono block. The central position of the locking system in relation to the mono block axis ensures maximum tightness. Such a design requires the employment of spark erosion [EDM machining] techniques that allow extremely close tolerances. Even with extensive shooting, the joint between barrel and action is maintained over long periods due to the axis pins being positioned in the lower part of the barrel itself and the bottom lug engaging with the action body.

Trigger System

All Zoli Guns are fitted with a hand detachable Zoli Design Trigger system. Hammers, sears and triggers plates are precision CNC machined, specially hardened and ground. All trigger shoes are adjustable fore and aft. This complex assembly is then tested and hand fitted by expert gunsmiths.

Z-Guns series trigger assemblies (Z-Expedition, Pernice and Custom line) have their critical parts Titanium Nitrate treated and the powerful main coil springs are coated with a self lubricating material for maximum corrosion resistance and minimum wear.

Custom Shop

Zoli Antonio has been building sporting firearms since 1945. Since we are passionate about what we do, we never stop researching and believe that innovation and traditions can or rather, must co-exist.

Our products are technologically advanced but we respect all the important gun making principles. Zoli's guns are revolutionary from a mechanical standpoint but classic in look and design. They reflect the principles of gun making that generated exquisite pieces in the past - real works of art that only skilled craftsmen could produce to be appreciated by a few discerning sportsmen.

Since 1980 the Zoli Custom Shop has built sporting firearms that range from the fine to the fantastic. Zoli custom firearms have been crafted for and with the input of the finest hunters and shooters. Our Masterworks line is geared toward the creation of products that are able to satisfy the most demanding tastes. All this is possible only by combining the latest technologies with refined finishes and great attention to detail, typical of the highest traditions in gun making.

Over & Under Game Line

Columbus

The Columbus field O/U shotgun is another product resulted from the “Classic Revolution” ZOLI embraced at the turn of the century to completely renew its offer. The shotgun has been totally upgraded from a technical and cosmetic standpoint. Now it comes with technical features which used to be found only on high grade guns manufactured in small volumes such as solid action, detachable trigger group, Boss-type locking system and silver soldered barrels which capitalize on 50 years of experience and set new ballistic standards.

Cosmetically the shotgun competes with the best hunting guns on the market thanks to its refined engraving, stock in select walnut, fine checkering, rubber butt plate and compact dimensions.

The Columbus comes in different versions suitable for traditional walk up hunting as well as woodcock, rabbit and wild boar hunting.

The trigger group can be quickly removed from the solid action using a small wrench supplied with the gun. The trigger group is easy to replace and service when needed. Every side of the Columbus action features elegant game scene engraving.

The “Columbus” comes with a pheasant in flight engraved on the bottom while flying partridges and ducks embellish the sides. In the “Columbus Gold” the scenes are the same as the Columbus, but in gold.

Nobile

Nobile features an elegant english scroll engraving. The Churchill style top rib and the solid side ribs provide to this model a refined line. The wood of selected turkish walnut with fine cut checkering

are equipped with a wooden butt plate. Nobile comes with interchangeable chokes and on demand with fixed chokes option.

Z-Expedition

Ready for world travel or the local quail field, the Expedition offers exquisite full coverage deep scroll engraving framing gold game scenes in deep relief (partridge on one side and woodcock on the other) and a french gray finish. Stocks are of grade 2.75 fancy turkish walnut with fine cut check-

ering and hand rubbed oil finish. butt plates are finely checkered. either english grip or pow stocks are available. Trigger mechanism and chokes are specially titanium nitrite treated and impervious to rust and corrosion. Every Z Expedition comes with five choke tubes and special hard case with all tools and spare parts kit.

Pernice

The range Pernice (partridge) is the most recent example of Zoli's commitment to manufacture a new range of guns exclusively dedicated to hunting. Pernice was inspired by the most classical gunsmith tradition, reinterpreting the theme of the round body in particular. Since the beginning, Pernice has communicated a refined elegance and has managed to remain modern in spite of fashion evolution, fully expressing the tradition while combining its well-known aesthetic appeal with an evolved manufacturing technique. In the US, Pernice has been awarded Best Hunting Gun of the Year 2017 by Gray's Sporting Journal. Pernice is available in 20, 28 and 410 gauge – a set including all three gauges is also available.

Pernice is fitted with the following:

- silver soldered barrel with full, Churchill-type rib
- Prince of Wales stock, oil polished, full fine checkering
- real Round Body action – round on every side, unique for this type of gun - made from a forged, alloy steel monoblock
- detachable trigger group with titanium-coated components, anti corrosion. Self-lubricating springs, also anti corrosion, ensuring a lasting performance
- a refined, handmade engraving by renowned 'Bottega Incisioni'

The engraving more in detail

The engraving for Pernice round body was studied in cooperation with Bottega Incisioni, an active presence in the engraving art scene for more than 60 years and famous all over the world for its prestigious and refined work. The signature 'Bottega Incisioni' stands out on every Pernice action, to certify its authenticity. The engraving is initially machined, then entirely hand finished. It depicts a low relief ornate with some intertwined leaves of Acanthus Spinosus, a plant that has deeply cut leaves. Acanthus appears also in Greek architecture, ornating Corinthian columns, of which the oldest example is found in the Apollo Epicurus temple in Peloponnese. The engraving on Pernice is low relief in the darker areas, in order to make them stand out, complemented by the stipple technique (dots). A shadowing technique is applied to the leaves, to obtain the right amount of movement and volume. The leaves develop from a weave that stems from the stock towards the barrel, ideally following the typical shapes of a round body gun.

The Pernice Ambassador model is identifiable thanks to the action and monoblock manufactured by master artisans with the chisel technique, the hand shaped and engraved safety, the Antonio Zoli name engraved in gold on the monoblock and the top rib hand checkered. The result is immediately recognisable: a round action with perfect volumes and lines that harmoniously fit with the upgrade quality wood.

Pernice Ambassador

*O/U Express Double Rifle &
Rifle Shotguns Combination*

Focus

Focus Lux

ZOLI is proud of being the Italian company with the longest and most prestigious tradition in building express rifles and rifle/shotgun combination guns. The ZOLI Focus is the third generation of express rifles sold throughout the world. Its structure, look, ballistic performance and dynamic embody the know-how acquired over the last 40 years by the company. Every gun in the Focus line comes with a reinforced action body made from a solid block of forged steel. The trigger system is mounted on a detachable plate, a feature never seen on express rifles before, which helps relieve both trigger and plate from structural stresses.

Every Focus comes with a top rib fitted for the ZOLI fast scope mount, a fixed rear sight and a blade sight adjustable in height. Both sights

feature optic fiber inserts which favor intuitive aiming. The Focus is available with either single trigger or double triggers with set trigger, extractors/ejectors and extra sets of barrels in the following configurations: two rifled-bore barrels, two smooth-bore barrels in 20 Mag or a smooth bore barrel + a rifled bore barrel.

The stock on the “Focus” features a round cheek piece, a Bavarian cheek piece on the “Focus Lux””. The wooden butt plates are always finely checkered. Thanks to their handling characteristics and stability the guns in the Focus line are ideal for driven hunts and hunts in small areas. When provided with one or two extra sets of barrels they become perfect hunting companions for almost every situation.

Corona

Corona SP

ZOLI was the first Italian company to produce rifle/shotgun combination guns in the early 60s and has manufactured over 85,000 units ever since. The current line known as “Corona” clearly capitalizes on the experience ZOLI has made over the years. The mechanical and ballistic performances of the guns as well as the safety features are second to none. The cocking system can be either manual or traditional, the former being provided with the exclusive ZOLI “ISD” device which stops the hammer travel in case of accidental percussion.

The percussion system comes with the “PPS” device that protects the hunter from gas generated by accidental explosions of perforated cartridges. The set trigger is more sensitive and precise thanks to a tiny screw that has simplified its regulation.

The “Revolution 4” project provides several types of cocking mechanism. The most innovative one is represented by the version with manual cocking (CORONA SP), which allows one to cock the gun by pushing forward the special button positioned at the rear part of the action. This system, which is unique to the Zoli range, is capable of cocking both barrels at the same time and is equipped with a sophisticated safety device. This device avoids accidental discharge due to violent shocks, breakage or disengagement of the sears.

The barrels are silver soldered, the stock features a traditional Bavarian cheek piece, the swallow-tail rib has been specifically designed for the ZOLI fast detachable scope mounts. A second set of smooth bore barrels in 20mag can always be fitted to every gun. The Corona comes in two versions the Corona and Corona SP with hand cocking system.

Bolt Action Rifle Line

Bolt Action Rifle Line Tech

The New Manual Cocking system available on models Evolution and Evolution Exclusive is the best available for this category.

This new manual cocking system has been studied to be ergonomic, silent and intuitive, conferring better comfort and safety.

Receiver and Bolt

are both made from solid steel bars using CNC machines and then undergo surface hardening treatment. The recoil lug is an integral part of the bar stock used to produce the receiver thus giving added strength and increased accuracy.

Removable magazine

The new Removable magazine that comes in 3 different models, to better adapt to all the calibers on offer. The magazine also contributes to the improved smooth feeding.

Trigger mechanism (Evolution)

introduces a new and innovative trigger mechanism made from a single, solid steel block. The trigger can work flawlessly thanks to the use of steel balls and pistons, instead of the more traditional levers, making it more precise, softer and safer to use.

Trigger mechanism (Bavarian & Pro S)

is available with set trigger, it's entirely made using CNC machines. It comes with the ISS safety system offering the following advantages;

- 1) It cannot be activated when the safety is on or the gun is unarmed
- 2) It deactivates automatically when the safety is applied.
- 3) It deactivates automatically when the bolt is opened.

This special system eliminates all possible risks connected with use of the set trigger, which, together with the standard double safety catch, means that Zoli rifles are truly unbeatable in terms of safe operations. Safety Catch (Bavarian & Pro S): the AZ1900 was the first standard rifle to be fitted with a safety with the DSS (Double Safety System) device. With the safety on, a special button opens the bolt and the round can be removed from the cartridge chamber in complete safety.

Evolution

Evolution left

Faithful to the company philosophy based on the continuous innovation of their products, Zoli is proud to present their new bolt-action rifle, Evolution. A modern proposal aiming to better understand the needs of today's hunter. Evolution offers a new, manual cocking system that is the best available for this category. The manual cocking system is ergonomic, silent and intuitive, conferring better comfort and safety. Evolution introduces a new and innovative trigger mechanism made from a single, solid steel block. The trigger can work flawlessly thanks to the use of steel bearing balls and pistons, instead of the more traditional sears, making it more precise, softer and safer to use.

Evolution also introduces a new, removable magazine that comes in 3 different models, to better adapt to all the calibers on offer. The magazine also contributes to the improved smooth feeding. Evolution provides a sliding fluidity of the bolt action and a mechanical softness that are both state-of-the-art. The rifle Evolution is unique as far as smooth operation, safety, practical use and user-friendliness are concerned. The best manufacturing quality is guaranteed since 100% of its components is made from steel parts produced employing the most modern CNC machines. Thanks to this production process, the recoil-lug is directly integrated with the main body. Evolution is available also in left handed version.

Evolution Exclusive

The Evolution Exclusive model was designed to meet the needs of demanding and refined customers. All finishes and attention to detail are entrusted to the long experience of our master gunsmiths. The deep scroll engraving specifically designed for the Evolution model highlights its low-profile line by combining exclusivity and elegance with exceptional technical characteristics.

The Evolution model is in fact available in both in classic cocking system version and in the new manual cocking system, the latter coupled to the new trigger group. A combination capable of increasing both the level of comfort and safety during use. The stock is made from a Turkish walnut selected blank on is embellished with rosewood inserts and a fine handmade checkering.

Bavarian S

The HUSQVARNA 1900 rifle has always been famous for its frame and bolt made from a solid block of steel, very fluid action and crisp trigger pull. ZOLI is proudly reproducing all these features and more and offering uncompromised quality at affordable prices.

The “Bavarian” line comes in different versions all featuring impressive traditional Mittel-European style Bavarian cheek pieces. The “DSS” safety system, the “ISS” set trigger and all safety features available come standard on every bolt action rifle in the Bavarian line.

Pro S

AZ 1900 Pro S comes with a Montecarlo stock and a traditional cheek piece. The stock has been specially shaped to perfectly fit the scope and the pistol grip has been studied to be very ergonomic, facilitate handling and increase comfort.

Even the entry level “Pro S” comes with all safety features available and has a left handed version.
